1. Introduction

- CEO : Mrs Park Mi-jee
- Established: July 1, 1994
 - Established with name of MACSAN
 Precision in 1994
 - Changed company's name to GMI in 2010
- Assets : US\$ 5.1 M
- Employees : 21
- Amount of sales : US\$ 7.0 M/year

- Factory(work shop)
- Changwon head office & factory Site: 2,079 m²,Building:1,650m²
- Kimhae workshop (cutting & warehouse) Site :3,300 m² , Building :1,719m²
- Key Business area
 - Parts Machining for Hardox Plates
 - Hardoxwear partner shopCutting , Bending, Welding, Machining

2. Vision & Mission

The only One-stop leader in Hardox market in Korea (Material, Cutting, Bending, Machining, Welding)
 1st Parts supplier in commercial vehicles in Korea

Leading company in HARDOX Wearpartner

- Leader company in SSAB Wardoxwearpartner
 - ▶ To have expertise in Hardox plate machining
 - ▶ On-site Customer consulting & design supporting.

Installation of the most suitable equipment for Hardox processing

- To install powerful machines for Hardox 550/600 machining.
- One-stop Hardoxwearpartner shop (Adding Fiber Laser M/C and Bending Machine)

Commercial Vehicles(Dump trucks)

- Enlarge production items from 130 item 260items
- Add buyers from 2 buyers to 4 buyers
- Parts development : 27Ton Cargo body

3. History & Certification

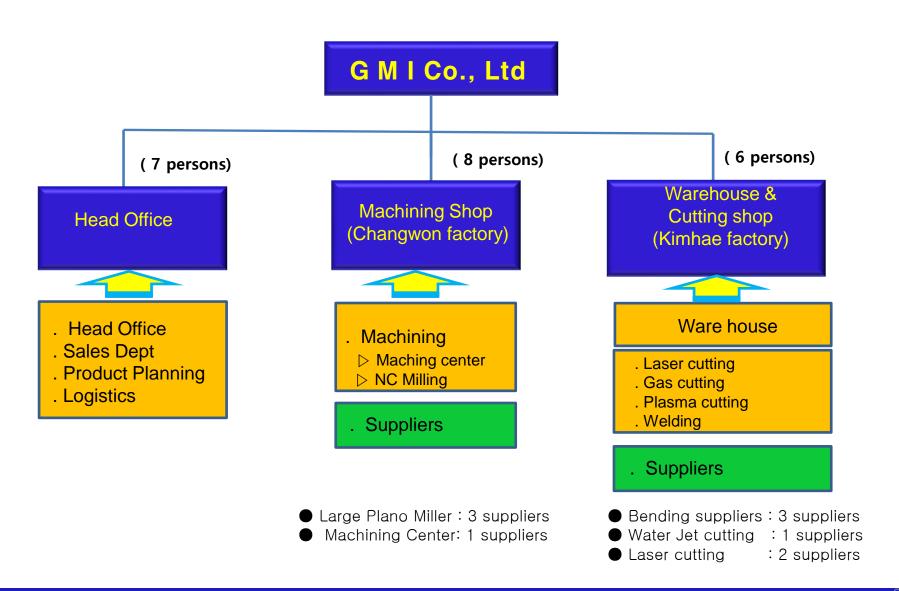

History

- 1994.7 Established with name of MACSAN
- Precision Co., Ltd
- 1997.3 Developed food machineries (5models)
- 2002.7 Sep up new machining factory
- 2003.5 Developed Trucks parts (Volvo trucks)
 - Lifting BKT & Hydraulic parts (31 items)
- 2010.3 Company name change to GMI Co., Ltd
- 2010.3 Start Electric equipment parts
 (Samsung Electrics : Robot hands etc)
- 2010.4 Established Hardox ware shop
 - Established Cutting, Bending, Welding factory
- 2010.11 Start precision parts for Volvo construction equipment Korea (Reduction gear)
- 2010.12: Set up 2nd cutting factory
- 2011.1~2023.7: 5 New added Machining center in Changwon workshop
- 2023.3 : Established new workshop in Kimhae

Certification

- ■2007 ISO 9001 :2008 , KS Q ISO 9001:2009 ISO14001;2008 , KS Q ISO 14001:2009
- 2001 Acquired CE Mark
 - . Food machineries
- venture Enterprise
- INNOBIZ Enterprise
- 2003 Acquired Clean enterprise certification

4. Organization

5. Changwon Factory (Machining)

Changwon factory (Machining shop)

Factory

● Space Area: 2,079 m²

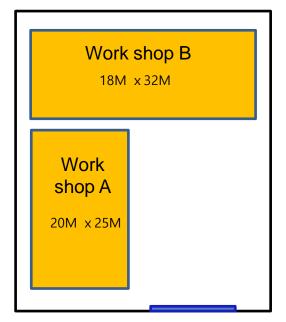

Building (A)

. 1F: Machining shop:500m²

. 2F: Assembly & Head Office: 500m²

Building (B)

. Machining shop :576m²

Video show . GMI Introduction

Changwon workshop

Machining Shop

Class	Model	Maker	Work table (X ,Y, Z)	Unit
Vertical Machining Center	Mynx950/50	Doosan/gear	2500 x 950 x 850	1
	Mynx750/50	Doosan/gear	1525 x 770 x 625	1
	Mynx650/50	Doosan/gear	1270 x 670 x 625	3
	Mynx650/50	Doosan/velt	1270 x 670 x 625	1
	Mynx400/40	Daewoo/velt	800 x 400 x 400	1
	Kv60	Wiea/gear	1200 x 600 x 550	1
	COMBI11	Kiheung/gear	2800 x 1100 x 1200	1
NC Milling Machine	U8S	Doosan/gear	1900 x 800 x 800	1
	COMBI U6S	Kiheung	1600 x 700 x 700	2
NC Turning Lathe	L210A	Wiea/8inch	8 inch	1
	L280	Wiea/10inch	10 inch	1
	SKT300L	Wiea/12inch	12 inch	1

DOSAM Phys ET

^{*1)} Geared Machine: Strong and more powerful machining

6. KimHae Factory (Cutting shop)

Kimhae factory (Warehouse & Cutting shop)

Factory

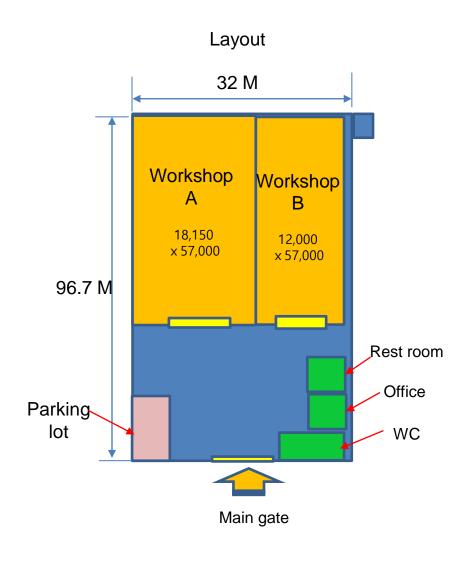

■ Space Area: 3,166 m²

Workshop (A)

. Laser, Plasma, Gas cutting: 1,035 m²

Workshop (B)

. Warehouse, Welding shop:684m²

Kimhae workshop

Cutting & Warehouse

Model	Maker	Stroke (X ,Y)	Unit
GAS Cutting	HANTO	4000*8000	1
CNC Plasma	ESAB	4000*18000	1
Laser Cutting M/C	TRUMPF 4030	2000*4000	1
Water jet	DS Waterjet	4000*8000	
Bending (Large size)	Gum-bu Bending	1000~3500Ton	
Bending (Middle)	Bu-kyeung Bending	100~300 Ton	
Bending (Small)	Daesan bending	100~250Ton	

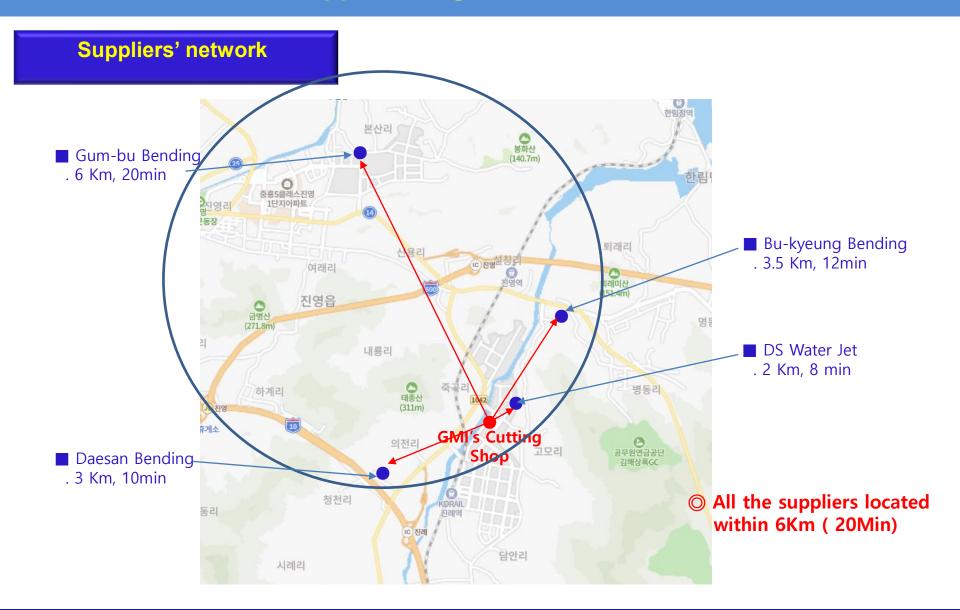

Suppliers Logistics Network

7. Business Area(1)

The leading HARDOX parts consulting company

- On-site support
- ▶ Design support for customers' Application
 - Product design by receiving the actual products.
- ▶ Consulting & Recommendation for cost saving application
 - Recommend the most suitable hardox materials

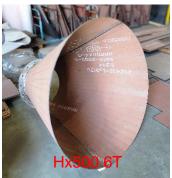

Product provided by customer and designed and manufactured by GMI

- ► Continuous contact and provision of new information through Internet E-mail
- Introduction of new products (HiTemp, HiAce, Tuf) and continuous provision of application cases.
- ▶ Periodic company visits and company survey updates

7. Business Area(2)

Hardox Specialized Shop (Cutting, Machining, Bending, Welding)

- Replaced with most powerful Machining Centers (geared type M/C)
- ► Powerful Machining for tough, strong and hard materials as like Hardox 600
- Continuous Development of the most suitable /effective tools capable of machining hardox 600

■ One-stop processing shop for Hardox Plate

- ► Cutting (W/jet Laser , Plasma, Gas) → Machining /Bending → Welding
 - New add Fiber Laser Machine (12Kw) (Cutting Max : 40mm Thickness , by Dec,2023)
- ► New establishment of Bending M/C

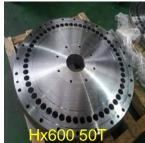

Video show

- . Timber blade #1 (도이재)
- . <u>Hardox600 Blade # 2</u> (고철 가위날)
- <u>. Hardox 600 blade # 3</u> (Tap 가공)

Geared type M/C

Hardox 600 (Milling , Drilling , Tapping)

8. New parts market development

- New market development for Hardox HiAce, Hitemp, 500Tuf
- Hardox HiAce
 - ► Customer : Daedyung facilities Co
 - . As a waste food reprocessing facility manufacturer, all the design of the standard material are currently being changed to HaHiAce, and a pilot production is scheduled for 1 unit by December 2023.
 - Expected to increase use of HxHiAce 4T,6T in the future (Requirement: 20Ton/1unit)
- Hardox Hitemp
 - ► Customer: Whasung Engineering Co.
- . As a POSCO's supplier, sample materials and test parts have been provided, and after testing If product performance is recognized, use is expected to increase.
- Hardox 500 Tuf
 - ► Customer: Jungbu special Construction C.
- . Manufacturer of weed and weed removal machine. Currently, Hardox500Tuf 8T,12T are used as rotary cutting blades, and 30,000 to 50,000 pieces are used annually. As a result of the test, the performance is excellent and the life is long. (Requirement: 8T~10Ton/Year)

Thank you
